- Easy to use
- Safe to use
- Dispenses up to 500ml boiling water per minute
- Dispenses boiling water within 8 seconds
- Energy saving
- Anti-drip feature
- Automatic lid release button
- Capacity - 2,5L
IMPORTANT SAFEGUARDS

Read this Instructional Booklet thoroughly before using your appliance, and save it for future reference.

• Before using the appliance, ensure that the voltage indicated on the rating plate corresponds to the wall outlet of your home. If not, please do not operate the appliance, and contact your local distributor for proper replacement.

• Do not use the appliance if the power cord, plug, control panel or housing is loose or damaged.

• Ensure that the appliance does not touch any hot surface.

• Do not place the appliance on or near any gas or electric burner or inside a heated oven.

• Always ensure that the appliance is placed on a level and steady surface.

• The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental disabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety.

• To protect the appliance against fire damage or personal injury, do not immerse any part of the appliance in water or other liquid.

• Do not touch any hot area or the water spout of the electric kettle when the appliance is in operation.

• While the appliance is in operation, do not touch or block the steam outlet.

• Do not use the appliance to heat anything other than water.

• Do not fill the electric kettle above the maximum level as indicated.

• To avoid damage to the heating elements, do not operate the appliance if the water level is below the minimum level as indicated.

• Unplug the appliance and ensure that it has cooled down completely before cleaning.

• To avoid any hazard, a faulty electrical cord must be replaced or repaired by the manufacturer or a qualified person.

• This appliance is intended for household use only.

HOW TO USE

Before using your Instant Electric Kettle for the first time, thoroughly clean the water tank to remove any odour or packing dust.

1. Filling the Instant Electric Kettle with Water:
   - Press the Lid Release Button (1) to open the lid.
   - Fill the proper amount of clean water in the water tank. Do not exceed the maximum water level as indicated.
   - Close the Water Tank Lid (9).

2. Boiling the Water:
   - Plug in the kettle.
   - Place the cup on the Water Drip Tray (5) and align it underneath the Water Spout (4).
   - Switch on the On/Off Switch (6), and the Operating Indication Light (2) will turn red.
   - Turn the Function Knob (3) to the "On" position, and the Operating Indication Light (2) will turn green. The Illuminating Light (7) around the Water Spout (4) will also turn on simultaneously. The boiling water will flow from the spout continuously in about 8 seconds.
   - Turn the Function Knob (3) to the "Off" position when you want to stop the water from dispensing. The Operating Indication Light (2) and the Illuminating Light (7) will turn off simultaneously.
   - Repeat the abovementioned steps if you need boiling water again.

Instant Electric Kettle
Model: KT2201C
220-240V 50-60Hz
2500-3000W
Capacity: 2.5L

HOUSEHOLD USE ONLY
CAUTION: DO NOT IMMERSE IN WATER

Unplug before cleaning and when not in use
Made in China
CLEANING:

- Always switch off and unplug the electric kettle before cleaning.
- Also ensure that the appliance has completely cooled down before cleaning.
- Never immerse the kettle, power cord or plug in water or any other liquid.
- Wipe the exterior of the electric kettle with a damp cloth, and do not use steel wool, sharp tools or abrasive cleaners to clean the kettle.
- For sanitary purposes, remove and empty the Water Drip Tray (5) daily.
- In order to keep the appliance in a good and functional condition, it is suggested to descale the kettle regularly, especially if lower quality water is being used.
- Lemon acid or white vinegar is recommended as a descaling agent:
  1. Add the lemon acid (30 grams suggested) or white vinegar (50 grams suggested) into the water tank;
  2. Fill the water tank to the maximum water level as indicated, and stir the mixture thoroughly;
  3. Turn the Function Knob (3) to the "On" position to boil the liquid until the water shortage indication light turns on, and repeat the same steps for three cycles;
  4. Change the water tank with clean water, and boil the water one more time to complete the descaling process.

STORAGE:

- Unplug the electric kettle.
- Clean the appliance, following the Cleaning steps as indicated above.
- Place the electric kettle in the original packaging in order to protect the electronic components and exterior of the appliance.
**Sunset Cookware’s Lifetime Warranty:**

**Sunset Cookware provides a lifetime warranty against the following:**

Defects due to faulty workmanship or materials on its line of small kitchen electric appliances. This warranty is limited to the extent that it does not cover damages caused by neglect, abuse or improper product use, including commercial use or any other use for which it was neither designed or intended. Please see the section in this manual on “Care and Storage” for any questions on its proper use. Further, this warranty does not cover parts subject to normal wear and accidental damage.

**Sunset Cookware** also expressly disclaims any responsibility for consequential damages for any incidental losses caused by the use of its products.

Any warranty of merchantability or fitness for a particular purpose with respect to this product is also limited to the One Year Limited Warranty period. Some jurisdictions do not allow disclaimer of the implied warranty with respect to consumer goods, so the foregoing disclaimer may not apply to you. The warranty gives you specific legal rights which vary by jurisdiction.

If your product requires service or support, please contact our Customer Service Department at +27 (0)15 293 0704 for assistance.
